Vertera™ 6G

Cash Recycling Technology
Right for the Times

Right for the Times...

Delivering frontline efficiency remains a critical imperative in the modern branch environment. Efficient transactions lead to better customer engagements and ultimately greater branch profitability. With the volume of teller line transactions declining in favor of self-service and self-directed banking transactions, the remaining face-to-face customer engagements are more critical than ever before.

But the technology must do more to meet today's banking needs. As modern branch footprints continue to shrink, recycling technology must be designed to fit into more space-constrained areas. With the movement to leaner staffing models and the role of the traditional teller expanding to a "universal banker" position, cash recycling technology must be easier for your staff to use and understand. Vertera 6G delivers on all these requirements.

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organizations to ensure their cash is managed securely and efficiently while delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

The Vertera™ 6G Teller Cash Recycler (TCR) is smaller in footprint, but its 'smallness' does not sacrifice speed, capacity or performance. It is simpler for staff to operate and the amount of start-up training is minimal. Vertera 6G is also smarter - with its large, touch panel LCD, the 6G is always available to provide real-time information to your staff and can prompt them with 'help' messaging as necessary.

Integrated into every Vertera 6G is our CashInsight™ Bridge technology which provides the ability to remotely monitor your cash recycler. With CashInsight Bridge as the gateway, you also have the ability to add powerful capabilities to help optimize your branch staffing and enterprise cash requirements.

Smaller

- 25-30% smaller footprint than predecessor with the same capacity
- Smaller service area required (see technical information)
- Ideal for microbranches, in-store branches & other space-constrained areas
- Fits under desk or teller counter workstations

Simpler

- Large color touch panel display provides useful status information
- Simple design with intuitive layout
- Ergonomically correct for greater staff comfort
- Minimal staff training required
- Other staff convenience functions (via touch panel LCD)
 - Inventory status
 - Machine status
 - Calculator mode
- Connectivity
 - Native Ethernet
 - USB or serial ports
 - Interface support for legacy Vertera connections

Smarter

- Intelligent note handling
- SDA® II offers advanced authentication, identification and fitness checking
- Low reject rates
- Auto-correct reduces jam frequency
- Integrated CashInsight Bridge technology
 - Remote monitoring
 - Remote software and note pattern downloads
 - Gateway to Business Intelligence applications
 - Multi-currency detection
- CashInsight™ Inform business intelligence solutions (optional)
- Future-enabled
 - Secure Transfer Concept (STC) option
 - High-level fitness sensor option
